THE PRESIDENT'S ADDRESS.
The address was as follows:
Mr. Toastmaster, Gentlemen: Today
I wish to speak to you on the question
of the control and regulation of those
great corporations which are popularly,
although rather vaguety, known astrusts; dealing mostly with what has
actually been accomplished in the way
of legislation and in the way of enforcement of legislation during the
past eighteen months, the period covering the two sessions of the Fiftyseventh Congress. At the outset, I shall
ask you to remember that I do not point of those who are fond of denying the existence of evils in the trusts, or who apparently proceed upon the assumption that if a corporation is large enough it can do no wrons.

I think I speak for the great majority of the American people when I say that swe are not in the least against wealth as such, whether individual or corporate, that we marely desire to see

We should be false to the historic principles of our government if we dis-criminated, either by legislation or administration, either for or against a man because of either his wealth of man because of either his wealth or his poverty. There is no proper place in our society either for the rich man who uses the power conferred by his riches to enable him to oppress and wrong his neighbors, nor yet for the demagogic agitator who, instead of atdemagogic agitator who, instead of at-tacking abuses as all abuses should be attacked wherever found, attacks prop-erty, attacks prosperity, attacks men of wealth, as such, whether they be good or bad, attacks corporations whether they do well or ill, and seeks, whether they do well or ill, and seems, in a spirit of ignorant rancor, to over-throw the very foundations upon which rest our national well-being. In consequence of the extraordinary industrial changes of the last half century, and notably of the last two or three decades, changes due mainly to the rapidity and complexity of our industrial growth, we are confronted with problems which in their presen ers. Our great prosperity, with its ac companying concentration of population and of wealth, its extreme spe cialization of faculties, and its development of giant industrial leaders, has

trol, in which I firmly believe as the only method of eliminating the real evils of the trusts, must come through wisely and cautiously-framed legislation, which shall aim in the first place to give definite control to some sovereign over the great corporations, and which shall be followed, when once this power has been conferred, by a system giving to the government the full knowledge which is the essential for satisfactory action. Then, when this knowledge—one of the essential features of which is proper publicity—has been gained, what further steps of any kind are necessary can be taken with the confidence born of the possession of power to deal with the subject, and of a thorough knowledge of what should and can be done in the matter.

"We need additional power, and we need knowledge. . . . Such legislation—whether obtainable now or obtainable only after a constitutional amendment—should provide for a reasonable supervision, the most prominent feature of which at first should be publicity; that is, the making public both to the government authorities and to the people at large, the essential facts in which the public is concerned. This would give us exact knowledge of many points which are now not only in doubt but the subject of fierce controversy. Moreover, the mere fact of the publication would cure some very grave evils, for the light of day is a deterrent to wrong-doing. It would doubtless disclose other evils with which, for the time being, we could devise no way to grapple. Finally, it would be control to the could be suppled to the could be suppled to the subject of the public would devise on way to grapple. Finally, it doubtless disclose other evils with rest.

The views thus expressed have now received effect by wise, conservative, and yet far-reaching legislation enacted by Congress at its last session.

ACTION BY CONGRESS. ACTION BY CONGRESS.

In its wisdom, Congress enacted the very important law providing a Department of Commerce and Labor, and further providing therein, under the Secretary of Commerce and Labor, for a Commissioner of Corporations, charged with the duty of supervision of and of making intelligent investiga-Secretary of Commerce and Labor, for a Commissioner of Corporations, charged with the duty of supervision of and of making intelligent investigation into the organization and conduct of corporations engaged in interstate commerce. His powers to expose illegal or hurtful practices, and to obtain all information needful for the purposes of further intelligent legislation, seem adequate; and the publicity justifiable and proper for public purposes, is satisfactorily guaranteed. The law was passed at the very end of the seasion of Congress. Owing to the lateness of its passage, Congress was not able to provide proper equipment for the new department; and the first few months must necessarily be spent in the work of organization, and the first investigations must necessarily be of a tentative character.

The satisfactory development of such a system requires time and great labor. Those who are intrusted with the administration of the new law will assuredly administer it in a spirit of absolute fairness and justice, and of entire fearlessness, with the firm purpose not to hurt any corporation doing a legitimate business—on the contrary, to help it—and, on the other hand, not to spare any corporation which may be guilty of illegal practices, or the methods of which may make it a menace to the problem welfare. Some substantial good will be done in the mimediate future: and as the department gets fairly to work use the department gets fairly to work use.

tributions which have been made in our time toward the proper solution of the problem of the relations to the people of the great corporations and corporate combinations.

But much though this is, it is only a part of what has been done in the effort to ascertain and correct improper trust or monopolistic practices. Some eighteen months ago the industrial Commission. an able and non-partisan body, reported to Congress the result of their investigation of trusts partisan body, reported to Congress the result of their investigation of trusts and industrial combinations. One of the most important of their conclusions was that discriminations in freight rates and facilities were granted favored shippers by the railroads, and that these discriminations clearly tended toward the control of production and prices in many fields of business by large combinations. That this conclusion was justifiable was shown by the disclosures in the investigation of clusion was justifiable was shown by the disclosures in the investigation of railroad methods, pursued in the fall and winter of 1901-1902. It was then shown that certain trunk lines had en-tered into unlawful agreements as to the trans-ortation of food products from the West to the Atlantic seaboard, giving a few favored shippers rates much below the tariff charges imposed upon the smaller dealers and the genupon the smaller dealers and the gen-

These unjust practices had prevailed to such an extent, and for so long a time, that many of the smaller shippers had been driven out of busines until practically one buyer of grain on each railway system had been able by his illegal advantages, to secure a monopoly on the line with which his monopoly on the line with which his secret compact was made; this monopoly enabling him to fix the price to both producer and consumer. Many of the great packing-house concerns were shown to be in combination with each other, and with most of the great railway lines, whereby they encount in the control of the great railway lines, whereby they encount in the control of the great encount in the control of the great railway lines, whereby they encounter concessions in raises. joyed large secret concessions in rates and thus obtained a practical monop-oly of the fresh and cured-meat indus-try of the country. These fusions, though violative of the statute, had

prevailed unchecked for so many years that they had become intrenched in and interwoven with the commercial life of certain large distributing localities; although this was, of course, at the expense of the vast body of lawabilding merchants, the general public, and particularly of unfavored localities. Under those circumstances, it was a serious problem to determine the wise course to follow in vitalizing a law which had, in part, become obsolete, or proved incapable of enforcement. Of what the Attorney-General did in enforcing it, I shall speak later. The decisions of the courts upon the law had betrayed weaknesses and imperfections, some of them so serious as to render abortive efforts to apply any effective remedy for the existing swils.

It is clear that corporations created for quasi-public purposes, clothed for that reason with the ultimate power of the State to take private property against the will of the owner, hold their corporate powers as carriers in trust for the fairly impartial service of all the public. Pavoritism in the use of such powers, unjustly enriching some, and unjustly impoverishing others, discriminating in favor of some places and against others, is palpably

others, discriminating in favor of some places and against others, is palpably violative of plain principles of jus-tice. Such a practice unchecked is hurtful in many ways. Congress, tice. Such a practice unchecked is hurtful in many ways. Congress, having had its attention drawn to the matter, enacted a most important antirebate law, which greatly strengthens the interstate commerce law. This new law prohibits under adequate penalties the giving, and, as well, the demanding or receiving of such preferences, and provides the preventive remedy of injunction. The vigorous administration of this law, and it will be enforced, will, it is hoped, afford a substantial remedy for certain trust evils which have attracted public unrest.

In my message to Congress for 1901 I said: "In the interest of the whole people the nation should, without interfering with the power of the States in the matter, itself also assume states."

Moreover, its passage has been supplemented by the enactment of a law to expedite the hearing of actions of public moment, under the anti-trust act, known as the Sherman law, and under the matter, itself also assume states. expedite the nearing of actions of pub-lic moment, under the arti-trust act, known as the Sherman law, and un-der the act to regulate commerce, at the request of the Attorney-General; and, furthermore, additional funds have been appropriated to be expended under the direction of the Attorney-General, in the enforcement of these ADMINISTRATION OF LAW.

ADMINISTRATION OF LAW.
All of this represents a great and
substantial advance in legislation. But
more important even than legislation
is the administration of the law, and
I ask your attention for a moment to
the way in which the law has been administered by the profound jurist and
fearless public servant, who now occuries the position of Attorney-General.

Viscount Cranborne Hints Possible Dissolution.

Flying Rumors of Intention to Speak to the Country on Irish Programme

IBY THE ASSOCIATED PRESS-P.M.] LONDON, April 3.-[By Atlantic Caile.] Viscount Cranborne, Under-Sec-Albans tonight, said that though did not believe that a dissolution of House of Commons was imminent said that though

Unionist party ought to be pre-ed for all contingencies. r. Wyndham, the Chief Secretary Ireland, speaking at Manchester to right, alluded to the same subject. He said he believed that when the bell and for the next elections, the Tory sarty would be found ready, and would sain carry its flag to victory.

Referring to the Ashland bill, Mr. Wyndham believed that it would be epudiated. Ireland, he said, had not phodiated. Ireland, he want the dis-naloyed the opportunities at the dis-smal of other parts of the empire, artly because in 1881, Parliament, inartly because in 1881, Parliament, in-tend of giving her Justice, gave her itigation. Furthermore, the last fifty of fixty years, the age of steam and oal, had not been happy or profitable or Ireland, a country lacking in min-ral wealth. Apart from the Justice of he case, continued the speaker, it was o England's interest that Ireland hould have a fair opportunity to ld have a fair opportunity to de

be England's interest that Ireland hould have a fair opportunity to deelop her agriculture.
"In times of peace," said Wyndham, 
Ireland is our best customer, and in 
var time, when everything would deend upon our control of the sea, it 
could be well to have a hig meat suphy in ireland. Every true imperial, as 
is hes Ireland to be a bridge, and not

In seeking a solution, he would set 
his two limits: One that "we must

Senator Foraker read an amdavit from Kenneth G. White, show-Ing a statement of the operations of the Southern Pacific from June 30, 1902, to January 1, 1903. The gross earnings for that period were 452,985.51, and net earnings \$12,575,028, leaving a deficit for Tactics of Men. the period of \$4,246.898. The month of January increased the deficit \$1,173,670. Senator Forsker stated that in the face of a showing like this, counsel for de-fendants contended that complainants had no right to complain. Judge Lurton announced that he

would file his decision next Monday with the clerk of the United States Court at Louisville.

### ESPEE STOCK RECOVERS.

MORGAN NOT SETTLING MATTER (BY THE ASSOCIATED PRESS-P.M.) NEW YORK, April 3.—The local eature of interest today in the Southern Pacific controversy was a recovery in the shares in the last hour. The rally seemed based on reports that J. P. Morgan had consented to settle matters by taking over the Keene holdings. These reports were promptly denied in every authoritative quarter, a mem-ber of the Morgan flym making this statement "There is no truth whatever in the report that Mr. Morgan or the firm of J. P. Morgan and Company have taken over from Jimes R. Keene or T. J. Taylor and Company any Southern Pacific stock. We have no in-

terest in the matter, directly or indi-rectly, in any shape, manner or form.<sup>1</sup> This statement, it was added, holds

Aimost forty inousand sandes out a southern Pacific changed hands during the day, the bulk of the trading taking place during the rally in the afteraoon. After selling down to 55 1-4, the stock advanced to 60%, and closed at 58, a net loss of 5-8. Much of the selling during the morning session suggested forced liquidation.

Keene said tonight, in relation to the report:

"The story published extensively in the evening newspapers that J. P. Morgan & Co. and Kuhn, Loeb & Co. arranged to take the Southern Pacific pool, is an unqualified falsehood. I have neither seen nor heard from J. P. Morgan during the twelve weeks I have been confined to my room, nor has any other person approached me on the subject.

be merged under a single control alarmed the people of the States con-cerned, lest they be subjected to what they deemed a monopoly of inthey deemed a monopoly of in-terstate transportation, and the suppression of competition. The Governors of the States most deeply affected, held a meeting to consider how to prevent the merger becoming effective, and passed reso-lutions calling up the national govern-ment to enforce the anti-trust laws argainst the alleged combination. When

begun by the government to test the vaildity of this transaction under the Sherman law.

At nearly the same time the disclosures respecting the secret rebates enjoyed by the great packing-house companies, coupled with the very high price of meats, led the Attorney-General to direct an investigation into the methods of the so-called beef trust. The result was that he filed bills for injunction against six of the principal packing-house companies, and restrained them from combining and agreeing upon prices at which they would sell their products in States other than those in which their meats were prepared for market. Writs of injunction were issued accordingly, and since then, after full argument, the United States Circuit control, and since then, after full argument, the United States Circuit control, and since then after full argument, the United States Circuit control, and since then after full argument, the United States Circuit control, and since then after full argument, the United States Circuit control in the human and accomplaint that they were suffering great injury in their business from the methods of the southern railroads in the handling and transportation of cotton. They alleged that these railroads, by combined action under a pooling arrangement to support their rate schedules, hid denied to the shippers the right to elect over what roads their commodities should be shipped, and that by dividing upon a fixed basis the cotton crop of the South, all inducement to compete in rates for the transportation thereof was eliminated. Proceedings were instituted by the Attorney-General under the anti-trust law, which resulted in the destruction of the pool and in restoring to the restraint upon the freedom of commerce.

In November, 1902, the Attorney-General directed that a bill for an injuncteral directed that a bill for an injunc-

road they elected, thus removing the restraint upon the freedom of commerce.

In November, 1902, the Attorney-General directed that a bill for an injunction be filed in the United States Circuit Court at San Francisco against the Federal Salt Company—a corporation which had been organized under the laws of an Eastern State, but had its main office and principal place of business in California—and against a number of other companies and persons constituting what was known as the salt trust. These injunctions were to restrain the execution of certain contracts between the Federal Salt Company and the other defendants, by which the latter agreed neither to import, buy, or sell salt, except from and to the Federal Salt Company, and not to engage or assist in the production of salt west of the Mississippi River during the continuance of such contracts. As the result of these agreements the price of salt had been advanced about 400 per cent. A temporary injunction order was obtained, which the defendants asked the court to modify on the ground that the antitrust law had no application to contracts for purchases and sales within a State. The Circuit Court overruled this contention and sustained the government's position. This practically concluded the case, and it is understood that if consequence the Federal Salt Company is about to be dissolved, and that no further contest will be made. The above is a brief outline of the most important steps, legislative and administrative, taken during the past eighteen months in the direction of solving, so far as at present it seems practicable by national legislation or

administration to solve, what we call the trust problem. They represent a successful effort to devise and apply rehl remedies; an effort which so far succeeded because it was made not only with resolute parpose and determination, but also in a spirit of common sense and justice, as far removed as possible from rancor, hysteria, and unworthy demagogic appeal. In the same spirit the laws will continue to be enforced.

Not only is the legislation recently emacted effective, but, in my judgment, it was impracticable to attempt more. Nothing of value is to be expected from ceaseless agitation for radical and extreme legislation. The people may wisely, and with confidence, await the results which are reasonably to be expected from the impartial enforcement of the laws which have recently been placed upon the statute books. Legislation of a general and indiscriminate character would be sure to fall, either because it would involve all interests in a common ruin, or because it would not really reach any evil. We have endeavored to provide a discriminating adaptation of the remedy to the real mischief.

The President, in his speech in front of the Capitol, said he was glad he had coing to Wisconsin, for the fact that here the people had put into practice to a peculiar degree the principle of "All men up, rather than some down." Continuing, he said: "We are passing through a period of great material prosperity. There will be ups and downs in that prosperity, but in the long run the tide will go on, if we but prove true to ourselves, and to the beliefs of our forefathers. To win, we must be able to combine in a proper degree the spirit of individualism and the spirit of cooperation. Each man must work for himself. If he cannot support himself he will be but a drag on all mankind, but each man must work for the common good. There is not a man here who does not at times need to have a helping hand extended to him, and shame on the brother who will not extend the helping hand."

At the conclusion of the second speech the President was taken to the Executive office, where for twenty minutes he held a reception for members of the Legislature and State officers. At 1:45 o'clock, with the same excort of soldiers and officials, he returned to the special train, which pulled out for Milwaukee at 11 o'clock.

"I believe with all my heart in this nation playing its part manfully. I believe that we are now on the omset of the twentieth century, face to face with great world problems; that we cannot help playing the part of a great world power, but all we can decide is whether we will play it well or iii. I don't want to see us shirking from the least bit of duty. We must hold our own, for if we is show ourselves weaklings we earn the contempt of mankind: and what is of more consequence, our own contempt; but I would like to impress upon every public man, upon every writer in the press the fact that strength should go hand in hand with courtesy, with scrupulous regard in word and deed not only for the rights, but the failings of other nations.

I am always sorry whenever I see any reflection that seems to come from America upon a friendly nation, and the saying of anything unkind, unjust or inconsiderate about any

"This is in substance my theory of what our foreign policy should be. Let us not boast, not insuit anybody, but make up our minds coolly what it is necessary to say, say it, and then stand to it, whatever the consequences may be."

After leaving the Soldiers' Home, the procession of carriages returned cityward, coming to a stop at the Exposition building, where the President was welcomed warmly on behalf of the city by Mayor Rose. The occasion for this nice little boost for the Santa Ana youngster was created by that same individual in the fifth inning yesterday afternoon, when he laid bat to the first pitched ball of the inning and deposited the sphere among the cages in Washington Park Zoo, a mile or so on tother side the left-field fence. The ball, crashing on a cage roof, set the wild animals to howling, so that the unearthly wall of coyotes rose in piercing crescendo

Is it necessary to explain that the gentleman from Santa Ana came home? Well!

This is the first home run of the season on the home grounds, and the splendid form in which it was made moved the heart of Al Levy to whisper to his right-hand trousers pocket. Forthwith came a crisp \$10 bill that found its way into the palm of Cravath.

TACOMA (Wash.) April 2.—The Pacific National League today succeeded the Pacific Northwest League. The magnates were in session from early forenoon until midnight, and will meet again tomorrow morning to receive the report of the Schedule Committee. Six games a week will be played, each club to have the same number of games as last year, while San Fracisco will see as much National League ball and as great a variety of attractions as can be arranged for. Garrett of Los Angeles, John B. Cole-

Garrett of Los Angeles, John B. Coleman of San Francisco and Dr. Emmett Drake of Portland were elected members of the Board of Directors. President Lucas was tendered a vote of thanks for his energy and ability in expanding the league, and was voted a liberal increase in salary. The club owners expressed themselves emphatically as against rowdy ball.

GIVING US A BLACK EYE.

A resident of the northern part of Los Angeles county sends The Times a long communication, two columns in length, in the shape of a copy of a letter which he says he received from a Boston man. In the communication, the Boston individual conveys the painful information that he is compelled to withdraw a proposition made a few months ago for certain Los Angeles county property, and that he has concluded to accept property offered him in the Sacramento Valley. Thus, if we are to take this communication for a fact, and not fiction, has Los Angeles lost and Sacramento county gained one gentleman from Boston. As to how serious this loss may or may not be we are unable to say, not having the pleasure of a personal acquaintance with the gentlesignature appended to the communi-

The reason why the gentleman of the headquarters of culture concluded to deprive us of the pleasure of his society, and cast in his lot in a section of swamps and scandals, is that lp whip the recalcitrant unionists he has been pained, horrified, shocked and thrilled in various other unpleas ant ways by information that seems to have come to him in great detail a to the weakness, and looseness, and "cussedness" of Los Angele county as a community. The major part of the lefter is devoted to a mur der recently committed in the county the perpetrator of which was let out on a \$10,000 bail. He (the Boston man, not the other perpetrator) does not mention any name, but evidently refers to a murder which took place in ago. He appears to be exceedingly conversant with all the details of this tragedy. Indeed, if the gentleman who sent in the communication had not stated that it had been received by him from a Boston man, one would naturally suppose that it was written by a resident of Antelope

The Boston man-or whoever is the clares that Los Angeles county is no place for a home-seeker, especially if he is a man of family, because "it is certainly the breeding place of 'crim-

minals'" (sic.) He adds: "It is evidently a place where law pensed, not to say miscarried. I think I called your attention to this fact the last time I was out there. Out in that particular section of California people are apparently without protection whatsoever, unless you care the enter upon a crimminal (sic) are to enter upon a crimminal (sic) ca reer, in which case, providing you have a little capital to start with, and a political pull to fall back upon, you are not only protected, but are in a are not only protected, but are in a position to earn a comfortable living, no matter how black a crimminal (sic) you may be—the blacker the better. At this distance lawlessness and ruffianism seem to be rampant in your midst. It is the exception and not the rule that a murderer is ever captured, and if captured, if possessed of a little money he has nothing to fear."

This is necessful "capacides" and

This is powerful "langwidge," andmight we perhaps suggest—just a trifle overdrawn. The putative person from Boston goes on to tell that he seems to have been out here wher comething horrfble was going onwhen an entire family was horribly slaughtered, for the sake of a few paltry dollars, within a few miles of Los Angeles city, the murderer hav-ing never been apprehended. During another visit to Los Angeles he ar rived just in fime to have his attention called to an unreasonable sentence imposed by a Los Angeles judge teens, whereby, for some trifling offence, this boy was sent to the penitentiary, where the chances are that he will emerge a trained "crimminal." Another time he did not happen to be on the spot, but a considerate friend immediately wrote him abou a poor Mexican peon, charged with murder, being tried in a language which he understood not a syllable. and sentenced, upon entirely circumstantial evidence, within three hours'

Brother Rogers appears to be not the only Boston man who takes an nterest in the "crimminal" record of neighbor who received from persons Angeles newspapers published in January and February, containing an ac ount of still another murder, "and the cowardice, the cruelty and the brutality is simply horrible and almost incredible, while the unprecedented consideration shown this brutish murderer is astounding." He then goes on, to the extent of several typewritten pages, indulging in red-hot denunciation of the chief actor in this crime—evidently the Antelope a discussion of which appears to be the main object of this communication from the Antelope Valley-that is, to say, from Boston. He adds:

"Yet, in a recent communication rerelyed by a friend of mine from a res ident of Los Angeles, it is stated that this brute has been released on \$10,-000, as bail, through, it is alleged, the influence and instrumentality of a prominent California Congressma who, owing to his political obligation to the murderer, is expected to assist in his defense. [Hard on Jim Mc-Lachlan!] What a spectacle! What a country to live in! A country where a youth of tender years is sentenced to the State penutentiary for a trivial State penitentiary for a trivia offense, and where a poor, ignoran and friendless Mexican had been ac tually railroaded to the same upon admittedly circumstantial dence, but a country where a typical assassin, uniformed with political strings, must not be confined, but has to be released upon a nomina When a Congressman judge, in order to retain his tenure of office, must thus cater to such a of office, must thus cater to such a cowardly and treacherous crimminal (sic) as the one that has just been released by your Los Angeles judge, there must be something not only radically wrong, but utterly rotten in

Huh! We should say so! The author of the communication has also been "reliably informed by a friend of mine who resides in Los Angeles" that from May 10, 1902, to January 30, 1903, not less than twentythree murders had been committed within a period of a little over ten months, and that of these twentythree murderers only thirteen had been captured, "from which you may draw your own conclusions as to the

efficacy of your police department."

It is true that there has been much crime of all kinds in Los Angeles during the past year. It is not, however, true, as might be supposed from a perusal of this communication, that Los Angeles stands out among leading cities of the United States as a sort of horrible example-a place to be shunned by all right-thinking, law loving people. The fact that Los Aning place of residence not only brings a crowd of wealthy health and pleasure-seekers to us (some of them from Boston.) but it also, quite naturally, attracts a swarm of "fellows of the and criminals of all kinds, who pre those gathered here. again, the importation of ignoran peons from Mexico by the railroad ompanies, to work on the new lines has led to much crime that cannot justly be charged up against the

the gentleman of the Antelope Valley may rest assured that the leading citizens of Los Angeles fully realize the fact that conditions here are not all that they should be, and are working hard with a determination to bring about a reform. A beginning has been made by an increase in the police force, and steps have been taken for the establishment of a rock pile, which will undoubtedly act as a deterrent, and cause Los Angeles to be rossed off the list of many undesirables, when making up their season's

As to the Antelope Valley crime re ferred to by the correspondent, it was certainly a most cold-blooded and lastardly assassination, deserving of the strongest condemnation and prompt punishment. The letting of the perpetrator of such an atrocious crime free on a bond of \$10,000 is certainly a legitimate subject for surprise and criticism. However, it ould be unjust to believe that Los Angeles county is a section of the country in which lawlessness is the rule rather than the exception. The contrary is the case. Still as we have said, there has been altogether. too much crime in this section of late. and our representative citizens have determined that the time has come to naugurate a reform.

Still, we have our doubts whether the alleged Boston gentleman will find a paradise anywhere, even beyond the lines of Los Angeles county.

We do not seem to hear much about the ether to everlasting smash. Sailing the seas of air remains, as before one of the problems that man, who sometimes acts as if he could accomplish anything, has failed to solve.

The Historical Society is still without a home, its records being housed in an attic of the Courthouse; while the meetings are held at members residences. An organization like this deserves better treatment at the hands of the people of this rich and rapidly growing city. The society is better appreciated abroad than at home, applications being constantly received from organizations in all parts of the world for copies of the society's publications. It had been hoped that some assistance might be obtained from the State Legislature, but the effort proved futile, and it now appears as if the society will have to lepend on private contributions if it is ever to secure a home. Will not les who have grown wealthy through from the adobe era contribute a little of their surplus to a fund for the establishment of the Historical Society in convenient and commodious fireproof apartments? Or perhaps it night be possible to obtain for it a location in the big convention hall that Los Angeles is about to construct.

GEORGE EDWARD MILLS HAS NO INDICTMENTS SUPPRESSED.

Law Partner of Dr. Richard C. Flow er's Son Tries His Hand at Securing Immunity for the Doctor and is Taken to the Criminal Court Building

[BY DIRECT WIRE TO THE TIMES.] NEW YORK, April 2.—[Exclusive Dispatch.] The most remarkable at-tempt ever made to bribe the District Attorney's office to secure the suppres on of indictments resulted in the arrest, this afternoon, in the Park Row restaurant of George Edward Mills, law partner of Jewell Flower, son of Dr. Richard C. Flower, the indicted promoter of Arizona, Eastern Montana and other notorious mining schemes. Mills, acting, he claimed, on behalf of Dr. Flower had just handed to Detective Sergeant Brindley of the Dis-trict Attorney's staff, \$2000 which he expected to be given to Assistant Dis-trict Attorney Garvin to secure immunity from prosecution for Flower. Brindley, in turn, according to private

agreement, handed the original indict-ments against Flower-to Mills. At a near-by table sat Roundsman Beery, also of the District Attorney s staff. After the exchange of indictments and money had been made, Brindler called to him and summoned also ndictment in Mills's pockets. He and Brindley then took Mills to the Crim inal Court building and into Dist.-Atty Jerome's private office. The trap into which Mills fell wa

The trap into which Mills fell was originally set with a view to catching Flower also, but the promoter was too wary, and failed to keep the engagement which Mills made for him this afternoon. Dist. Atty. Jerome orthis afternoon. Dist.-Atty, Jerome or-dered the trap set after overtures had been made by Mills through a third party, several days ago. The purpose of the bribe was to secure for Flower immunity from prosecution on indict-ments recently found against him for grand larceny, based on charges brought by Mrs. Belle Gray Taylor, the well-known authoress, and on evidence secured by her attorney. Alternating waves of awe, interest and delight swept over a society mathematical delight swept of the Burbank Theater mane of Dr. J. Alexander McIvorandeal, the occult scientist. It was a first appearance here since his return from an eventful engagement at manululu, and was one of the most accessful of his many performances at this city. The lecture was upon favorite subject, "The Power of mught," and some of the demonstration of the rare power, of the permarks mind were startling. Four mand four gentlemen formed the body's assisting committee, and their is were read like an open book, difficult experiment of relocating tiden article by interpreting, billadd, thought waves through a third didual, was successfully accomined, and won great applause. Seeks "Influence" of Parker and Brown in Retention of His Position.

Quaking under the possibility of los-ing his position as warden of San Quentin prison, Martin Aguirre has come to Los Angeles for comfort and Quentin prison, Martin Aguirre has come to Los Angeles for comfort and support, and is appealing to those who he thinks will have the greatest influence with the Board of Prison Directors and the State administration. It is reported that the question of appointments is to be settled early this month, and the general understanding is that there will be a "shake-up" of the attachés of both penitentiaries—Folsom and San Quentin. Just how far up or down this reorganization of forces will extend is a matter of conjecture, but the common impression is that very few of the old guard will be left.

Aguirre no longer has a brother-in-law at court in the person of the one-time gov. Gage, and he does not feel so secure in his place as he did before the recent change of administration. The rigid investigation of affairs at the prison by the legislative committee did not brighten prospects and the atmosphere is dedidedly murky.

Walter Parker and Luther Brown are among those upon whom Aguirre has called for comfort and assurance of support, but there is considerable doubt as to the amount of "influence" these dignitaries will be able to exert at the State Cupital. As Parker was removed from his snap as expert of the State Board of Examiners, salary \$2000 per year, after Gov. Pardee assumed office, it is not thought that the wily politician's "drag" will avail anything for Aguirre, and Brown's hopes died with Gage.

—One thing that Aguirre hopes to establish is that he worked ardently for the election of Gov. Pardee among the Spanish-speaking voters of Los Angeles county, but there are dark hints that his ardor was not of the burning order.

VICTIMS OF THE GRIP.

THE DISEASE REPORTED TO BE EPIDEMIC THIS SPRING.

its Visitation the Cause of Much Suffering-flany Deaths and the Loss of Thousands of Dollars in Wages - Questions Answered.

Health report show that the pres ent epidemic of grip is the worst that this country has experienced in many years. Not only is the disease widely spread, but it is of unusual severity and has been the cause of much suffering and many deaths. There is scarcely a factory or a workshop which has not been running short-handed on account of the ravages of grip among its employés and the loss he disease already amounts to thousands of dollars.

The questions are often asked whether there is any method of home treatment for the grip and whether the after-effects of the disease can be driven from the system. These are answered by the following from Mrs. Rosina Hart, of Eby, War-rick county, Ind. She says: "I had an attack of the grip three years ago and, when it had run its course, my health was wrecked. My right lung was almost filed up and it was only with difficulty that I could breathe. There was a constant tingling all over my body, my heart would flutras a feeling of faintness that came ver me at times and I was so weak hat I often feared I would sink Nothing helped me, and I con-

FORGED TELEGRAMS. Sensational Criminal Prosecution of New Yorker at Hermosillo-Strong Case Made Out Against McCurdy.

SPECIAL CORRESPONDENCE OF THE TIMES. | HERMOSILLO (Sonoro, Mex.) April prosecution in the case of W. J. N. Mc-Curdy of New York City, charged with forgery, has been concluded, and ap-pears to be pretty conclusive as to the

young man's guilt. The forged tele-grams, two in number, were offered as evidence and read as follows: CAMPO SANTO NINO, Sonora, Mex., March 16, 1903.—M. E. Harby, care of Yaqui Copper Company, 170 Broadway. New York. Issue nine thousand shares Yaqui stock fayor, I. F. Swain at once Yaqui stock favor L. P. CAMPO SANTO NINO, Sonora, Mex. N. G. Nash, 170 Broadway, New York Have issued at once nine the shares Yaqui stock favor L. F. Swain and deliver to National Bank of Com-merce, accepting their receipt there-for. W. P. HARLOW.

for. W. F. Hallow Mr. Harlow denied having sent the telegrams; also denied having any knowledge of their being sent. knowledge of their being sent.

The three telegraph operators employed in the Federal telegraph office here, who were on duty at the time the telegrams were flied, were positive that McCurdy sent the telegrams. All of them were acquainted with the prisoner, as he had frequently before, when in Harlow's employ, sent telegrams over Harlow's signature.

Max Muiler, manager of the Banco de Sonora, and Cashier A. F. Smith both testified that they were well acquainted with McCurdy's handwriting, and that the body of the telegram was

dualited with McCurdy's handwriting tically have to be rebuilt.

In approaching the crossing the mointh that the body of the telegram was in the handwriting of that gentleman, and that the signitures in both cases were clever and well-executed forgeries of Col. Harlow's handwriting and the momentum of the car caused its of the freight to dash against the side of the freight that the side of ies of Col. Harlow's handwriting and

McCurdy's attorney gave notice that his client would take the time limit before offering testimony for the debefore offering the constant of the carried by McCurdy in his defense. His friends are making numerous sensational charges about McCurdy being prosecuted so as to force him to sign some mysterious papers, the import of which cannot be learned.

his allegations by a written statement to that effect over Col. Harlow's signature as president of the Yaqui Copper Company. This, the latter gentleman claims to be a rank forgery, and not in any way approaching in execution or cleverness the ones McCurdy affixed to the two telegrams.

McCurdy presented this claim at the New York office of the Yaqui Copper Company through the International Bank of Nogales and the National Bank of Commerce in New York. Issue of the stock was refused and the paper returned as "no good."

McCurdy's scheme to secure the stock by telegram would have worked but for the fact that N. E. Harby, to whom the first telegram was sent, was no longer vice-president, but was replaced by William Sauntry at the annual election of the company in January, which fact was unknown to McCurdy. Mr. Nash is private secretary to Col. Harlow and fills the position formerly held by McCurdy.

Col. Harlow alleges that there are others in a conspiracy formed to rob his company on a large scale, and openly made the following sensational charge:

"I believe that before I get through with McCurdy, a prominent Nogales banker and another well-known man."

Correct Methods Bring Correct Results

An ailing man, above all things, wishes to be a well man-he wants a perfect cure from all his ills. If the recuperative forces have the right help, nature will estore herself to normal conditions-our education, our experience enables us to give just the help that is required. mproved methods are widely different om the old routine practice, we go to the root of the trouble, finding the cause. and then by the application of our rarional treatment the patient at once sees improvement, which is steady and rapid until a permanent cure is effected-you pay when you are cured.

The latter also has engaged an attorney to throw as many difficulties in the way of the new concern as possible. It is understood that several of the members of the board have expressed themselves as anxious to have new capital begin operations in the town, while it is known that one member will insist that the new concern be given the franchise with the handicap that its wires must go under ground. The representative of the new company says he is willing to accept the franchise with this condition if the Sunset is also forced to put its wires underground. The fight gives promise of being a lively one.

The Home concern was a few weeks ago refused a franchise by the Supervisors, but the managers, for the applicant say that they will secure this county franchise at another meeting. Amateur theatricals were presented this evening at the Auditorium under the auspices of Santa Monica Lodge, No. 133, Fraternal Brotherhood. The portrayal of "Mrs. Katzenjammer's Party" was under direction of Joseph Bossert, a professional. The piano accompaniments were by Miss Lottle Huse.

After the recent rainstorm Dr. Hunt discovered a big hole in the rear of his property on the north corner of Third street and Oregon avenue. A measurement showed the hole to be seventy-five feet deep. It was about eight feet in diameter. No one appears to know how it came to be there. As it was something of a menace to neighboring property, it was filled.

### NEWS AND BUSINESS.

Fruit Agency's New Officers.

At a meeting of the California Pruit Agency yesterday, new officers were elected, as follows: President and gen-eral manager, A. H. Naftiger; vice-presidents, F. O'Neill, F. Q. Story; secretary, G. W. Felts; treasurer, W. T. S. Hammond; cashier, J. L. Mer-

Woodmen at the Sea.

The officers and degree team of Pa-eific Camp, No. 5282, Modern Woodmen of America, went to Santa Monica by special car hast night to exemplify the degree work for Santa Monica Camp. Several candidates were initiated, and a banquet was tendered the visitors.

Rev. Dr. F. H. Weller, pastor of the Presbyterian Church of Ione, Cal., is dead. Dr. Weller was the first president of Occidental College, and had an extended acquaintance in Los An-geles and Southern California. Ar-rangements for the funeral will be an-nounced later.

Miss Ellen M. Stone's Lecture.

Miss Ellen M. Stone, the missionary who was held for ransom by Macedonian brigands, and whose case occupied the attention of the civilized world, will tell the story of her captivity, next Tuesday evening, at the First Congregational Church, corner of Sixth and Hill streets. County Medicos Meet.

The regular session of the Los Angeles County Medical Association was held last night in Chickering Hall, No. 32 South Broadway. Dr. D. N. Block of the University of Michigan, gave a paper on "Some Points on the Diagnosis and Treatment of Typhoid Fever," which was followed by a general discussion. Found Him in Jail.

Found Him in Jail.

For several days the detectives have been looking for a young Mexican, Alerio Garcia by name, whom they wanted for the alleged robbery of a room on Central avenue, occupied by Charles Hoffman. Yesterday it was ascertained that the man had been arrested on another charge, and was serving a sentence on the chain gang. He was rearrested, and charged with burgiary.

The subject, "Resolved, that social-ism would produce an ideal and prac-tical organization of society," will be discussed on Thursday evening, April 5, in the Y.M.C.A. Auditorium, by Massrs. J. A. Marchus, Ross Taylor and L. Lippmann of the Woodbury Business College, for the affirmative; and Measrs. A. O. Switzer, H. H. Thomas and R. L. De Jarnette of the Y.M.C.A. for the negative.

Ed Francis, tired of dodging officers and thinking that every one he saw was about to arrest him, surrendered himself to a policeman last night, and said he is a deserter from the United States Navy. He enlisted as an apprentice and was assigned to duty on the U.S.S. Boston. While the vessel was in San Francisco Bay, he took French leave and returned to his home in this city. He is not yet of age.

Cornelio Grenada reported to the police yesterday that during the night before, while he was "sleeping," some unknown their searched his pockets and robbed him of \$52. He did not remember where he had been asleep, nor did he remember whether he had been drinking. When he awoke his pockets were turned the wrong way, and his money had disappeared. The detectives insisted that he had been simply "rolled" while drunk.

Harmonious Kick.

Residents along Vermont avenue, south of Twenty-fourth street, are planning a grand concerted kick at the street department on account of the lax care exercised in regard to street crossings. When the street was graded, a few months ago, all the crossings were torn up, and were never replaced. Consequently the unfortunate residents have had to wade through all the recent storms, and as protest has availed nothing, they are about to try desperate measures.

A railroad man, who declined to give his name, but stated that he was from Beaumont, reported to the police early yesterday morning that he had been robbed of \$97 by two women in the Tenderion district. He told who one of them was, and Frankle Ray was arrested by Patrolman Harrison. She produced \$35, and stated that she had given an equal amount to Ida Kitchier. The latter was also arrested, but lenied all knowledge of the matter. The victim of the robbery had been howing his gnoney in several saloons and the women relieved him of it, besuse he said he desired.

May Extend Car Service.

Attorney Walter L. Bacon, representing the Garvanza Improvement Association, had an interview with officials of the Los Angeles Railway Company yesterday, in regard to extending the service of the University cars to the northern city limits. This service had been previously promised, but only about a half-dozen cars were so run, when the company curtailed the route so as to end at Avenue 60. This was done, it is claimed by Attorney W. E. Dunn, because of a section of the balance of six blocks to the city limits is single-tracked, and to operate University cars over it would delay and disarrange the running time of Pasadena cars. However, it was promised that the matter would be taken up to-day, and it is probable a schedule will be arranged that will allow the desired extension of service.
